TIMSIE HO

Timsie Ho is a Senior Sustainability Consultant at Finoptis with expertise in ESG strategy, reporting, and regulatory compliance.

Formerly with Ernst & Young 's (EY) Climate Change and Sustainability team, he advised multinational organizations on ESG disclosures and frameworks including CSRD, GRI, TCFD, and ISSB, helping organisations strengthen sustainability performance, transparency, and decision-making.

Timsie has completed an MSc Exploration Geology – University College Cork (Ireland); BSc International Geoscience – University of Montana (USA); Business and Climate Change (Certificate) – University of Cambridge, Institute for Sustainability Leadership (2024)

AREAS OF INTEREST

Timsie has a special interest in the following sustainability areas:

Solar Farming: Solar energy offers a powerful solution, and solar farms are at the forefront of this transition. By harnessing the sun's abundant energy, solar farms not only contribute to a cleaner, greener planet but also provide a financially viable option for long-term energy savings, job creation, and local economic development.

Circular Economy: The circular economy offers a transformative solution, shifting the focus from 'take, make, dispose' to 'reduce, reuse, recycle,' and 'regenerate.'

Wind Farming: Wind farms, with their ability to generate large-scale, renewable energy without the harmful emissions of traditional fossil fuels, offer both an environmentally responsible and economically viable approach to energy production.

Sustainability Reporting: Timsie is a fully qualified Sustainability Consultant, and he can help organizations develop comprehensive ESG reports that not only meet regulatory requirements (ASRS / AASB S1 / S2 ...) but also demonstrate a genuine commitment to environmental stewardship, social responsibility, and strong governance.

Sustainable Development Goals (SDGs): In addition to SDGs relating to climate change (SDG 13, 14, & 15), Timsie has a strong focus on the following SDGs:

- i) SDG 2 – Zero Hunger.
- ii) SDG 6 – Clean Water & Sanitation.
- iii) SDG 11 – Sustainable Cities and Communities

STRATEGIC AND PROJECT MANAGEMENT SKILLS

Timsie applies a pragmatic, outcomes-focused approach to ESG delivery, combining strategic insight with disciplined project management to turn sustainability objectives into measurable business outcomes.

- ESG Strategy Development – supporting the design and implementation of corporate sustainability roadmaps.
- Stakeholder Engagement – collaborating with clients, project teams, and senior leadership across multinational environments.
- Bid and Tender Support – preparing ESG content for pre-qualification and tender submissions.
- Project Delivery and KPIs – monitoring progress, identifying risks/opportunities, and aligning ESG initiatives with business plans.
- Research and Critical Analysis – identifying trends, risks, and innovations in sustainability to inform decision-making.

NEXT STEPS

Book a commitment free appointment today to discuss your sustainability challenges, regulatory obligations, or strategic priorities, and discover how a tailored, commercially focused ESG approach can support your organisation's success.

If your organisation is navigating ESG requirements, sustainability strategy, or regulatory reporting, **Finoptis Consulting Services** can help you move forward with clarity and confidence.
